

# USB Programmer

Product ID: USAP

The USB Programmer is used to connect Acsys’s mecha-  
tronic keys and locks with the Acsysware software installed  
on a computer. After directly connecting to a computer’s  
USB port, the USB Programmer is used to pass data to and  
from the Transfer Key to create edit, and delete locks, black-  
list keys, and upload lock access logs. User keys are insert-  
ed into the programmer to create, edit, and delete access  
rights and upload key access logs.
